ABSTRACT

Included are annotated citations of articles, books, dissertations, directories, conference proceedings, reports, speeches , and bibliographies, most of them published during the first six months of 1968. Citations are classified into six broad categories: Outdoor Recreation Resources; Administration of Resources and Programs; Recreation Users, Activities, Demands and Values; Research; Education; and History and Philosophy. Each citation gives from two to fifteen "key words" indicating content. There is a subject index, a geographic index, and an author index. Appendices list the literature cited by document types. PREFACE

This fourth index of outdoor recreation and environmental quality articles, books, dissertations, directories, conference proceedings, documents, reports, speeches, and bibliographies covers selected items of literature published, with minor exceptions, during the first six months of 1968.

Volume IV of the INDEX TO SELECTED OUTDOOR RECREATION LITERATURE has been compiled by the Bureau of Outdoor Recreation. The citations of Canadian and United Kingdom articles were made possible through the continuing cooperation of Canada's Department of Indian Affairs and Northern Development.

The citations in this volume are identified by numbers beginning with the number 80001. The first digit, 8, represents the year 1968. Items are numbered successively as they appear in the INDEX. There are 1113 citations, the numbers ranging from 80001 to 81113.

Several changes have been made in this INDEX since Volume III. Another category, "Education," has been added. Thus, as found in the Table of Contents, there are now six broad categories into which outdoor recreation literature is classified. Within each category, the citations are arranged alphabetically by author, or, if the work is anonymous, by title.

A major change has been made in the method of annotating the items listed in this volume of the INDEX. Whereas previously abstracts described the content of the cited materials, a system of "Keywords" has now been substituted. From two to fifteen keywords are listed following each citation. These keywords, or descriptors, serve not only to give a general idea of the subject content, but also guide the individual in search of information to pertinent articles. Secondary sources of references such as abstract journals and indexes served as sources of certain reference citations.

There are three separate indexes:

1. Subject index. This contains approximately 750 keywords, arranged alphabetically, each with the citation numbers indicating references having information on a specific subject.

2. Name index. This contains authors, editors, reviewers, corporate bodies, and persons responsible for or discussed in the articles, and all other proper names except place names, which appear in the Geographic index.

3. Geographic index. This refers to citations by cities, counties, States, countries, continents, mountains, rivers, and other miscellaneous geographic terms, as well as by proper names of federally administered units, such as national parks, national forests, and national monuments.

Sources listed

The literature cited is listed by form in the appendices.

Appendix I contains the list of periodicals appearing in this volume.

Appendix II contains the list of books; documents and reports; proceedings, hearings, and speeches; and bibliographies and directories cited in the Index.

Suggested changes

Readers are invited to send their comments and criticisms. Additional sources of technical and scientific writings on outdoor recreation subjects are welcomed.
